

Cheap to build is *not* cheap to own

ASK FIRST

Is it your core domain, the thing that differentiates you?

OWN IT

Maylin Leal, via domain-driven design

no ↓

THEN

Does it need deep domain expertise, or an auditor’s sign-off?

BUY IT

Divya: Twilio, Stripe · Ivan: finance & payroll ERP

no ↓

THEN

Is it internal, and do you use only a sliver of what you pay for?

BUILD CANDIDATE

Hooper, M3 USA: \$72K/yr system, 1 engineer, 1 month

BEFORE YOU BUILD · THE GATE

Ownership and exit

Who is on call, and how long will it live? MAYLIN

Can you get rid of it after its builder leaves? IVAN

Proven like the vendor: user acceptance + parity tests BRIAN

Two-way door; model and inference layer kept swappable DIVYA

“Vibe” is how you build, not a third option (the panel, mostly agreed).
