

THE UPCOMING WEEK · NYC AI · SEPT 14–17

Four rooms in person, one all-day build

MON

6:00pm · New York Times Building
LeadDev New York Meetup

TUE

6:00pm · Zo Computer, Brooklyn
The New AI Computer: An Evening with Zo

WED

6:00pm · Midtown
Postgres Tuning in the Age of AI

THU

10:00am–8:00pm · Microsoft Research Lab **HACKATHON**
Frontier Build NYC

NOTABLE WEBINARS

TUE 10:30am	How Attio uses Attio
TUE 11:00am	Beyond Integration Licensing Cost
WED 12:00pm	Clay: Rebuilding the Marketing Tech Stack
WED 1:00pm	Context is King (Notion)
THU 12:00pm	Signal Rich, Action Poor (RevGenius)

See. Do. Who checks?

ROOM	WHAT THE AGENT SEES	WHAT IT MAY DO	WHO CHECKS
LeadDev MON · ENG LEADERS	The codebase	Write code at speed; build, buy or "vibe" internal tools	Human reviewers, where AI pull requests wait longest
Zo TUE · CONSUMER	Its own cloud computer, plus connected Gmail, Calendar and Drive	Write and run code, host web services, work 24/7	Open: prompt injection, which Zo calls inherent to LLMs
Postgres WED · DATABASES	Curated stats, schema, stored query plans; no direct database connection	Recommend; read-only	A human applies the change
Frontier Build THU · HACKATHON	Context a human supplies (Level 1)	Build whole features in sandboxes (Level 2)	Human (Level 1) → agentic reviewer + CI (Level 2)

"Context Is Everything," in plain terms

Planner statistics

The map Postgres's query planner routes by, like a GPS.

EXPLAIN vs.
EXPLAIN ANALYZE

The route it plans vs. the route it actually drove.

pg_stat_statements

A running tally of the most frequent and slowest queries.

Indexes

Faster lookups; every write updates the index too.

The talk's test: hand an AI only the SQL, then hand it this context, and compare the tuning advice.

The summer that set this table

APR 30	pganalyze opens its MCP server: curated stats only, no direct database connection	POSTGRES
JUN 15	Xata archives its standalone AI database agent	POSTGRES
AUG 9	OpenAI discontinues ChatGPT Atlas as a standalone browser	ZO
AUG 30	OpenClaw, the self-hosted personal agent, announces 2.0; its code sandbox still ships off by default	ZO
SEP 1	GitHub lets Copilot code-review approvals count toward required reviews	LEADDEV · FRONTIER
SEP 8–9	GitHub adds managed sandboxes and admin-set agent permissions to Copilot	FRONTIER
